BOREA BRC2

Datasheet

The BRC2 is the most powerful center speaker in the BOREA range. Specially designed for home cinema systems, it ensures clear and precise dialogue reproduction to recreate an optimal sound experience.

With its two 16 cm drivers, it offers a wider soundstage and enhanced dynamics. Its natural cellulose pulp cones provide exceptional realism, particularly for the reproduction of human speech.

The BRC2 also incorporates the EFS tweeter used on BOREA speakers to ensure perfect sound harmony with the entire range, guaranteeing a homogenous home cinema experience.

Its bass-reflex configuration with double front port enhances bass and allows for flexible installation.

Its Scandinavian design, available in four finishes, blends perfectly with the rest of the BOREA range, combining simplicity and refinement.
